Pre-Conference Workshops (All are ½ day sessions)

Morning Session (9:00 am – 12:00 noon)

Banner Tips and Tricks for Newbies – Morgan Chandler McCormack, Tori Gaddy, Kathy Adams

New to Banner? All the information you need to know to get started as a new Banner user. This session will explore the basics of using your new Information System, exploring the outside resources, navigation, and tips and tricks necessary to succeed with Banner.

Page Builder – Sherri Hester

Page Builder Workshop Objectives
- Understand Page Builder functionality
- Build a fully functioning basic Banner Self-Service Page Builder page including basic css styling and basic JavaScript
- Review how the University of North Alabama has utilized Page Builder

The intended audience of this technical hands-on workshop are Banner Business Analysts / Technical Analysts responsible for managing Custom Processes within Banner. Attendees must have:
- Banner Extensibility installed and operational with ability to access from off-campus
- Ability to access all functionality within Page Builder.
- Ability to grant privileges to Page Builder users and roles

Note - Discussion may be around the ability to build/create database functions, packages, or procedures, but this is not a requirement for the page development.

SQL Basics and Fundamentals – Chris Cheatwood, Robert Segrest

Relational database concepts
Data normalization
Relationships
Part of the query, operators, etc.

Afternoon Sessions (1:00 – 4:00 pm)

Who's Popping in Your Selection? Creating Banner PopSels (Population Selections) – Stephanie Miller

Are you popping? In a selection population, that is...

Have you ever thought....if I just knew who the students were in this group I could _____? Well now you can!

Come and learn the life blood of financial aid...how to create quick selections of students in Banner. If time permits (and with access to your system) we will have some hands-on selection writing.

Hands-On SQL: Writing Queries Against Banner Data – Chris Cheatwood, Robert Segrest

A hands-on session primarily focused on student data in the Banner database. Sample queries may include General Person, Admissions Application, Learner Record, Catalog, Schedule, Academic History.

Attendees will need to come with a device with connectivity back to their institution. Attendees will also need permissions/access to write SQL queries against their institution's Banner database (Prod or Non-Prod), either direct SQL access via SQL Developer/Toad or Datablock designer access to Argos.
